

6 STATISTICS TO CONSIDER WHEN EVALUATING ERP VS. BEST-IN-CLASS SUPPLY CHAIN SOLUTIONS

DID YOU KNOW?

Most ERPs are not built to effectively manage the complexity of healthcare supply chain.

UP TO 67%

Up to 67% of ERP supply chain implementations fail. As more solutions migrate to the cloud, the failure rate is likely to climb to as much as 90% by 2025.

ONLY 10%

BY 2025, only 10% of organizations running a cloud-based ERP will leverage their ERP solution for more strategic processes such as e-sourcing, contract management and spend analysis.

Ivalua's best-of-breed supply chain solutions for healthcare enable you to lower operating costs, and increase visibility into your procurement and supply chain processes, so your clinicians can focus more on patient care and outcomes.

Here's how Ivalua outperforms the rest:

Increase addressable spend up to

42%

Increase contracted savings up to

8%

Increase compliance savings up to

28%

organizations achieve **88%+** spend under management with best-of-breed supply chain solutions, VS just 54% using traditional ERPs alone.
